

Sani-Vak G3

Lavatory System Scale Remediation Chemical

Case Study

BEFORE

Extreme scale buildup in vacuum line

AFTER

Sani-Vak G3, used with our Recirculation Cleaning Tool, successfully removed scale buildup and drastically improves vacuum line performance.

USAGE

Scale Remediation

APPLICATION

Celeste® Sani-Vak G3 is a state-of-the-art remediation chemical for solving the problem of heavily scaled vacuum toilet lines that are functioning poorly, emitting malodors, and are prone to blockages. Using Sani-Vak G3 in a scale remediation program will clear the lines of scale and bring them back to "like new" condition.

SP-VAKG3/55

ISSUE

Excessive scale buildup in vacuum waste lines has caused the toilet line to function very poorly. Buildups and malodors occur and provide an undesirable in-flight experience.

RESOLUTION

Celeste® Sani-Vak G3, when used with our proprietary Recirculation Cleaning Tool, creates a negative pressure that circulates the cleaning fluid at a controlled temperature of 109°F (43°C) to soften, dislodge, and remove scale from pipe walls.

SP-RCTOOL

It is recommended to use Sani-Vak G3 once every 2-3 years. Gly-Vak can be used on a weekly basis as a preventative maintenance chemical.

Celeste Part #	Description	Case Specification	Pallet Specification
SP-VAKG3/55	55 Gallon Drum	136 x 23 in, x 532 lbs (91 x 58 cm, x 241 kg)	34 drums, 1 layer, 42 in (107 cm) height
ESP-VAKG3/55	55 Gallon Drum	136 x 23 in, x 532 lbs (91 x 58 cm, x 241 kg)	34 drums, 1 layer, 42 in (107 cm) height
SP-RCTOOL	Individual Tool	48 x 72 x 45 in, x 1100 lbs (122 x 183 x 114 cm, x 499 kg)	1 tool, 1 layer, 45 in (114 cm) height
